About Me

I am Juan Quintero, a historian turned passionate frontend developer. My mastery of JavaScript, React, Tailwind CSS, and TypeScript has been forged through a self-taught journey and a bootcamp. Merging my unique perspective with strong technical skills, I specialize in creating engaging and meaningful web experiences. Ready to contribute creativity and innovative solutions to your team. Let's connect and build something great together!

Skills

['HTML5', 'CSS3', 'JavaScript', 'React', Tailwind CSS, 'TypeScript', 'Figma']

Projects

Full Stack Developer - "eGeekStore"
Henry Bootcamp | Dec. 2023

- I participated in the creation of an e-commerce platform at SoyHenry Bootcamp, covering backend, frontend, and databases to ensure a comprehensive and functional user experience.
- I designed and developed the entire user interface using Tailwind CSS, ensuring an attractive appearance and intuitive navigation.
- I contributed to the team not only with technical skills but also in decision-making, providing valuable perspectives and fostering a collaborative environment.

Full Stack Developer - "Henry Dogs"
Henry Bootcamp | Nov. 2023

- I led the development of a Single Page Application (SPA), HenryDogs, connecting and manipulating data from a dog breeds API. I implemented Sequelize, Node, Express, React, and CSS for a complete user experience.
- I coordinated the integration of data from the API using Sequelize and achieved an visually appealing presentation of information cards about dog breeds in the SPA, employing CSS.
